ABSTRACT OF THE DISCLOSURE

An image processing system, includes an operating unit, which select a first size of a reproducing medium, a size information acquiring unit, which acquires size information related to a template for defining a layout of an object, the size information indicating a second size of a reproducing medium, and a print control unit, which outputs an instruction for printing a predetermined object on the reproducing medium having the first size in accordance with the template. The first size is different from the second size indicated by the size information related to the template. The aspect ratio of the reproducing medium having the first size is equal to, or approximates to that of the reproducing medium having the second size.
